corporate | credentials

At NCS SoftSolutions, we thrive on challenges be it technology challenges, challenges from the competition or even from ourselves. The expectations we have set on ourselves are much more than development of products and services. We see ourself as innovators and solution providers with a definite edge.

We are headquartered in Chennai and have support centers across the country.

Our core competence is in providing proven, customized products and solutions in the areas of Banking, RFID and Newspaper technology. We help over 30% of commercial banks in India to integrate their business and automate their processes. Our RFID solutions enable organizations to plug operational bottlenecks and enhance business efficiency. Our highly appraised solutions for the newspaper industry help publishers to efficiently manage advertisements, layout planning, news desk and other critical operations.

At NCS Soft, our vision is to be reckoned as a leading global player by providing value-added high quality technology solutions to our clients, by combining technology skills, domain expertise, process focus and a commitment to long-term client relationships.

At the core of our operations are a team of high caliber professionals with rich industrial expertise and astute business acumen. They are ably supported by a dedicated team of development, support and marketing professionals.

With a proven methodology, process driven approach, global delivery model and focus on quality, we enable businesses to function more efficiently, seamlessly and profitably.

Print Media Solution

NCS SoftSolutions, has expertise and experience that spans across the industry verticals including Banking, RFID, Print Media, e-Business and Enterprise-wide applications. We are headquartered in Chennai and have support centres across the country.

At NCS Soft, we are among the leading companies in the country to harness technology to build robust applications for the newspaper industry. We have developed and deployed comprehensive advertisement management and news desk management systems for one of India's leading national dailies.

These applications seamlessly handle a wide spectrum of services including collection of advertisements, auto-placement of advertisements and related accounting management.

Our newsdesk management solutions have significantly brought down the time evolved in all activities right from news collection from location till the newsdesk. This, in turn has considerably improved the productivity and customer satisfaction.

Ads Management system Implementation - A Case Study

A leading national daily from South India with over 125 years of news reporting experience and a mammoth circulation of over 10 lakhs a day, required applications to meet their increasing needs in the advertisement department.

NCS Soft took up the challenge and developed a web solution. The system facilitates on-line entry of advertisement on the website by Franchisees, collation of various advertisement from the site at the Head office Composing section, processing and sending it to the printing software.

The applications effortlessly manage huge volumes of ads that are printed everyday. The publication prints around 80,000 ads every week, across 13 editions. Our publications are centralised and offers the convenience of pagination at the branches as well.

NCS SoftSolutions (P) Ltd.

New No 39/2, Old No 16/2, Azeez Nagar 1st street, Azeez Nagar,
Kodambakkam, Chennai - 600024. India
Ph: +91-44-24735415/24735416/24735417
website: www.ncssoft.in Email: marketing@ncssoft.in

Apart from being extremely flexible and highly parameterized, the system facilitates extension of deadlines to book ads thereby ensuing increased revenues.

As part of the on-going maintenance and upgradation, NCS Soft has consistently come up with innovative solutions to meet the market demands for the publication.

The various applications we have developed include:

- Online Ads booking
- Ad Audit System
- Ad scheduling
- Reporters Desk
- Ad placement & pagination
- Ad layout planner
- Agency News & Photographs Sorting & Routing

The pagination applications are available on both Adobe Indesign & Quark flavours. These applications can be easily integrated to other mainline solutions like CCI.

The NCS Soft Value Proposition

We believe that our Value Proposition framework when tailored to meet our client's specific business and process delivery requirements will further enhance the value we passionately deliver to our customers on a consistent basis.

Though a combination of leading-edge technology and a top-notch team of software professionals, NCSSoft helps you stay ahead in your business, armed with well managed information. This experience has been the cornerstone of NCSSoft's renowned accuracy and timeliness, and the foundation for our leadership in the area of Advertisement Management.

Our diversified business practice represents a wide range of commercial, industrial and financial enterprises.

RFID Solutions

NCS SoftSolutions, has expertise and experience which spans across industry verticals including Banking, RFID, Financial sectors, Print media, e-Business and Enterprise-wide applications. About 30% of the commercial Banks in India use our software. We are headquartered in Chennai and have support centers across the country.

Radio Frequency Identification (RFID) is technology, which uses harmless radio waves to automatically identify objects and people, in real time without any manual intervention. The data gathered is instantaneously transferred to or updated in the back-end computer system, for further processing.

RFID can work in tandem with other complementing technologies like Barcode, Biometrics etc and can be seamlessly integrated with legacy application. Our RFID (Radio Frequency Identification) solutions act as enablers to alleviate operational pain areas and enhance business efficiency. Our domain expertise and Enterprise solutions experience act as backbone to analyze the customer's explicit and implicit requirement set, with industry demands in the backdrop and architect solutions that exactly fit the customer.

Some of the thrust areas of our RFID solutions are:

Enterprise Wide Solutions

Access control, Time & Attendance with Payroll processing, Asset management, Library management, Document/File management, Canteen management, Guard patrol tracking.

Transportation

Automatic Vehicle Identification (AVI), Vehicle Access Control, Fleet Management, Container Tacking, Traffic Management, Ticking, Electronic Toll Collection, Yard Management, Airport Ground Transport Management Systems (GTMS), Baggage Identification.

NCS SoftSolutions (P) Ltd.

Ph: +91-44-24735415/24735416/24735417
website: www.ncssoft.in Email: marketing@ncssoft.in

Retail

Smart Shelves, Pallet/Item Tagging, Inventory management, Loyalty programs, Product Authentication Anti-theft gateways, Out-of-stock Cutback System.

Healthcare

Infant protection, Wander prevention, Hospital Asset management, Blood Banks, Patient File management, Staff management, Emergency response, Mortuary management.

Industrial Solutions

Supply Chain Management (SCM), Real Time Location Systems (RTLS), Inventory Tracking, Warehouse Management, Assembly Line Identification, Process Control, Forklift / Crane Positioning, Automated Guided Vehicle (AGV) Positioning, Logistics Management, Maintenance Log Management.

Apart from this, our team has a penchant for challenging and path-braking project that demand nothing but the best.

Few application areas where we offer cutting edge solutions:

Integrated Library Management System with EAS Security

The Library Management Solutions based on RFID technology has RFID tag affixed on each book/CD in the library. This chip (programmable) stores all the information related to the item (books, CDs etc). This chip also has a security feature which can be activated / deactivated.

The solution includes Integrated Library management software, Book Drop station, Self Check-out station, Staff assisted Programming / Circulation station, EAS gateways, Shelf inventory management of Books/CDs and other resources.

NCS SoftSolutions (P) Ltd.

website: www.ncssoft.in Email: marketing@ncssoft.in

Access Control Systems

These systems are used to provide access only to authorized personnel. It would also track and log the details of entry and exit to various personnel and instantly update the Personnel records for HR related process. This can be extended to visitors also, so that visitors have time-bound permission to specific areas. Any deviations could be easily tracked and corrective action taken immediately.

Contactless Payment Systems

RFID based Contactless payment system enables consumers tap or wave their payment cards on a specially equipped merchant terminal that then transmits payment details wirelessly, eliminating the need to swipe the card through a reader. The RFID card can be used both for identity management and e-payments by just waving the card in front of the Terminal. A printed receipt can be issued, at the point of sale, as acknowledgment. This would considerably reduce the purchase transaction time and avoid long queues.

Canteen Management

The system monitors different types of food products and their consumption. Analysis of statistical data collected over a period of time, helps prevent wastage and unnecessary expenditure at the canteen. It can be scaled up or down based on the requirements of the management, supporting rule based dispersal of food, rationing system. Support for multiple companies makes it an inevitable part of a modern canteen.

Asset Tracking and Management

The system helps easy monitoring of critical assets, Checks-out/Check-in for identifying location, tracking of misplaced assets. It keeps record of the personnel holding a movable asset (example: laptop, PDA etc.) at any point in time.

Retail Shelf-Inventory Management

An effective way to track, update and control the stock in the shelves without manual intervention. When the garments are tagged, the complete information regarding the movement of specific class of items, availability in the shelf, stock replenishment needs etc can be analysed instantly.

Supply Chain Management

RFID's ability to automatically identify individual items with utmost accuracy even in harsh climate conditions, makes it suitable for implementation across various stages of the supply chain. Some of the application areas could be constant tracking of inventory and automatic indent placement based on Re-order level, tracking of goods received, quality report details, rejection rate, stock movement from the Warehouse to the production line, tracking consumption pattern at production line etc.

Apart from the above solutions, we have vast expertise to offer solution specific to any industry or organisation.
